

Wian Coetsee

3D Environment Setup

Environment Description & Top Down Drawing

The environment will be near a second story floor, or ledge since my audio relies on the main character looking up and calling. The type of environment is a modern day home due to the character in the beginning of the audio is listening to the television news telling residents to not leave their homes. Time of day planned is somewhere in the middle of the day near 1pm.

Asset List

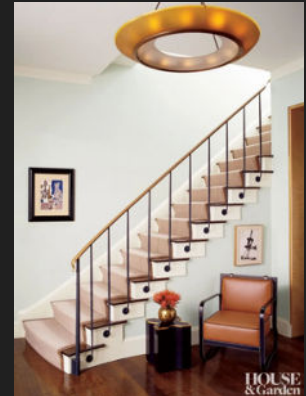

1. Plastic dining chairs - x6
2. Dining table - x1
3. Dining table supports - x2
4. Plate - x1
